
Dosing (Pouch Machine)

Application Info: 013 [10.2005]

Pouch machines are often used for dosing liquids, powders etc. in the chemical, pharmaceutical and food industries.

In this application the Rotastep starts and stops a dosing pump which doses liquids into small plastic bags (pouches).

Advantages

- Long service life.
 - Maintenance-free service life. I.e. No adjustments required throughout the service life.
 - High repeat accuracy ensures savings in material.
-
